

Derbyshire Local Wildlife Sites Register for Bolsover

Prepared by Derbyshire Wildlife Trust on behalf of the Bolsover District
Council and Derbyshire County Council.

Published February 2018

Introduction

This document provides information on each of the Local Wildlife Sites within the area covered by Bolsover District Council.

What are Local Wildlife Sites?

Local Wildlife Sites are areas of land or water that support populations or assemblages of species and/or habitats that are of recognised substantive nature conservation value. The Derbyshire Local Wildlife Site system seeks to ensure, in the public interest, the conservation, maintenance and enhancement of these sites.

- ❖ The Local Wildlife Site system is non-statutory and does not impose any legal constraints upon normal land management practices at sites.
- ❖ Sites are assessed against agreed guidelines that set thresholds for the selection of individual habitats and species (Derbyshire Local Wildlife Site Selection Guidelines 2003 as amended). Site designation is undertaken by the Derbyshire Local Wildlife Sites Panel.
- ❖ The Local Wildlife Site network aims to provide a comprehensive rather than representative suite of sites.
- ❖ The Local Wildlife Sites together with Sites of Special Scientific Interest form the core sites within the District or Borough's ecological network. They form a vital repository and refuge for fauna and flora found in the area and together with other 'stepping stones and corridors' help to facilitate the movement and dispersal of wildlife through the rural and urban areas.
- ❖ Local Wildlife Sites have a significant role to play in meeting overall national and local biodiversity targets.
- ❖ Local Wildlife Sites represent local character and distinctiveness.
- ❖ Local Wildlife Sites contribute to the quality of life and the well-being of the community, with many sites providing opportunities for enjoyment, recreation, research and education.
- ❖ The selected sites are marked on Local Plans and under Government guidance local authorities have developed planning policies to help protect sites from development pressures.

Updates

The Local Wildlife Sites Register is updated annually after the meeting of the Local Wildlife Sites Assessment Panel. This allows for new sites to be added,

sites to be removed if they no longer qualify as Local Wildlife Sites and for boundaries to sites to be amended.
